

Title

DLL_Surface_Cpp_Sequential_Gradient2_Tilted

Picture

Overview

This user-defined surface can be used to model a tilted gradient 2 surface like a cleaved multi-mode fiber. Compared to the gradient 2 surface, this surface contains 2 additional parameters for the tilt.

Code Exchange Type

DLL_Surface

Language

C++

Author

Sandrine Auriol - Zemax

Instructions

1. Installation

Just open the attached ZAR file and the required DLL will be automatically extracted to the following folder:

\Zemax\DLL\Surfaces\

2. How to use

This is a gradient 2 surface with 2 additional parameters for the tilt. The derivatives of the index have been calculated with Mathematica.
